

# Identity Access and Management (IAM)

## Step 1: Open AWS IAM Dashboard

- Log in to the AWS Management Console.
- Navigate to **Identity and Access Management (IAM)**.
- Review the IAM Dashboard, which displays security recommendations, IAM resources, users, roles, and account information.

# Identity Access and Management (IAM)

## Step 2: Access the Users Section

- In the IAM navigation pane, select **Users**.
- The IAM Users page displays the list of existing users.
- Click **Create User** to start creating a new IAM user.

## Step 3: Specify User Details

- Enter a unique **User Name**.
- Choose the authentication method:
  - Autogenerated password, or
  - Custom password.
- Configure password settings and determine whether the user must reset the password at first login.
- Click **Next**.

## Step 4: Assign Permissions

- Select how permissions will be assigned:
  - Add user to a group.
  - Copy permissions from an existing user.
  - Attach policies directly.
- Choose the appropriate permission option based on organizational requirements.
- Click **Next**.

# Identity Access and Management (IAM)

The image displays two sequential screenshots of the AWS IAM console's 'Create user' wizard, specifically for the 'us-east-1' region.

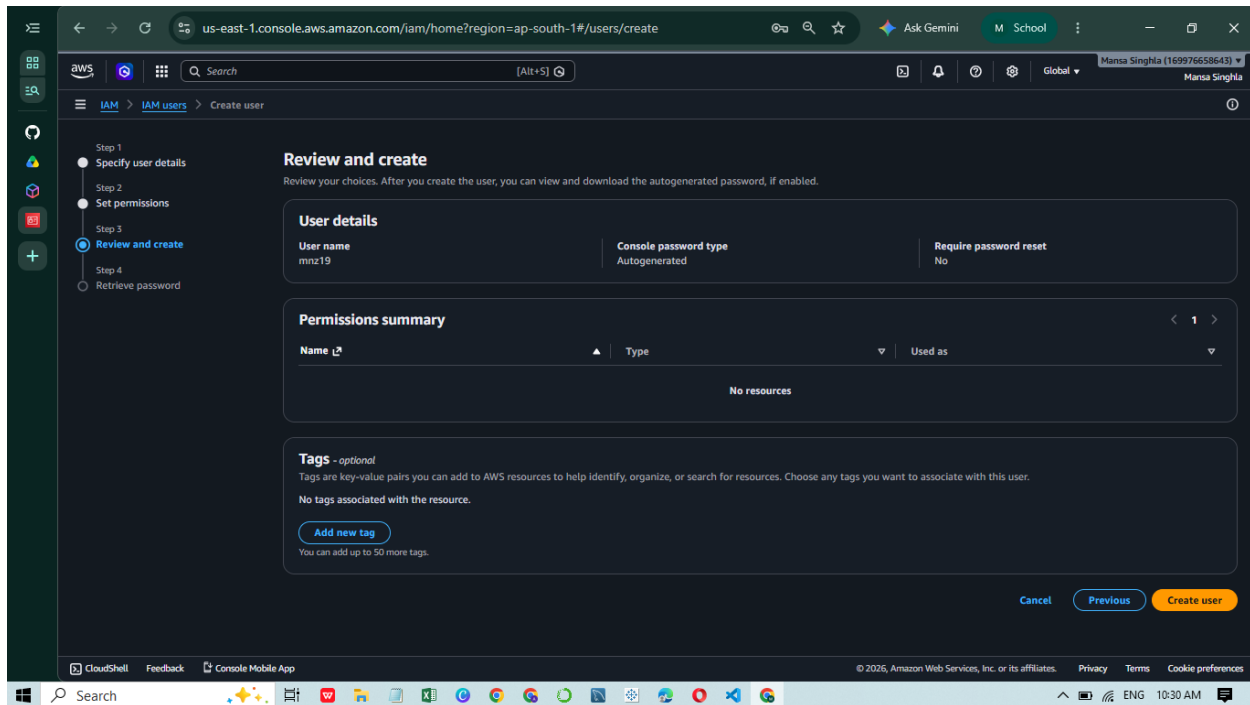

**Top Screenshot: Specify user details**

- Step 1: Specify user details** (Selected)
- User name:** mnz19
- Provide user access to the AWS Management Console - optional:** ☒ (Selected)
- Console password:** ☒ Autogenerated password (Selected)
- Custom password:** ☐ (Not selected)
- Users must create a new password at next sign-in - Recommended:** ☐ (Not selected)
- Buttons:** Cancel, Next

**Bottom Screenshot: Set permissions**

- Step 2: Set permissions** (Selected)
- Permissions options:**
  - ☒ Add user to group (Selected)
  - ☐ Copy permissions (Not selected)
  - ☐ Attach policies directly (Not selected)
- Get started with groups:** Create a group and select policies to attach to the group. We recommend using groups to manage user permissions by job function, AWS service access, or custom permissions. [Learn more](#)
- Buttons:** Cancel, Previous, Next

# Identity Access and Management (IAM)

## Step 5: Review and Create User

- Review the user details and permission settings.
- Optionally add tags for identification and resource management.
- Click **Create User** to complete the creation process.

## Step 6: Retrieve Login Credentials

- After successful creation, AWS displays the user's:
  - Console sign-in URL
  - Username
  - Password
- Download the credentials file or send login instructions to the user.
- Store credentials securely.

# Identity Access and Management (IAM)

The screenshot displays the AWS IAM console interface. At the top, a green banner indicates 'User created successfully' with a 'View user' button. The main content area is titled 'Retrieve password' and includes a 'Console sign-in details' box. This box lists the 'Console sign-in URL' as `https://169976658643.signin.aws.amazon.com/console`, the 'User name' as `min219`, and the 'Console password' as a masked string with a 'Show' button. Navigation buttons at the bottom include 'Cancel', 'Download .csv file', and 'Return to users list'. A sidebar on the left shows the 'Create user' workflow steps: 'Specify user details', 'Set permissions', 'Review and create', and 'Retrieve password' (which is currently selected). The bottom of the image shows a separate browser window displaying the AWS homepage with the headline 'Meet your unique security requirements' and a 'Start free with AWS' button.

# Identity Access and Management (IAM)

The image shows a browser window with the AWS IAM console. The top part displays the 'IAM user sign in' form with the following details:

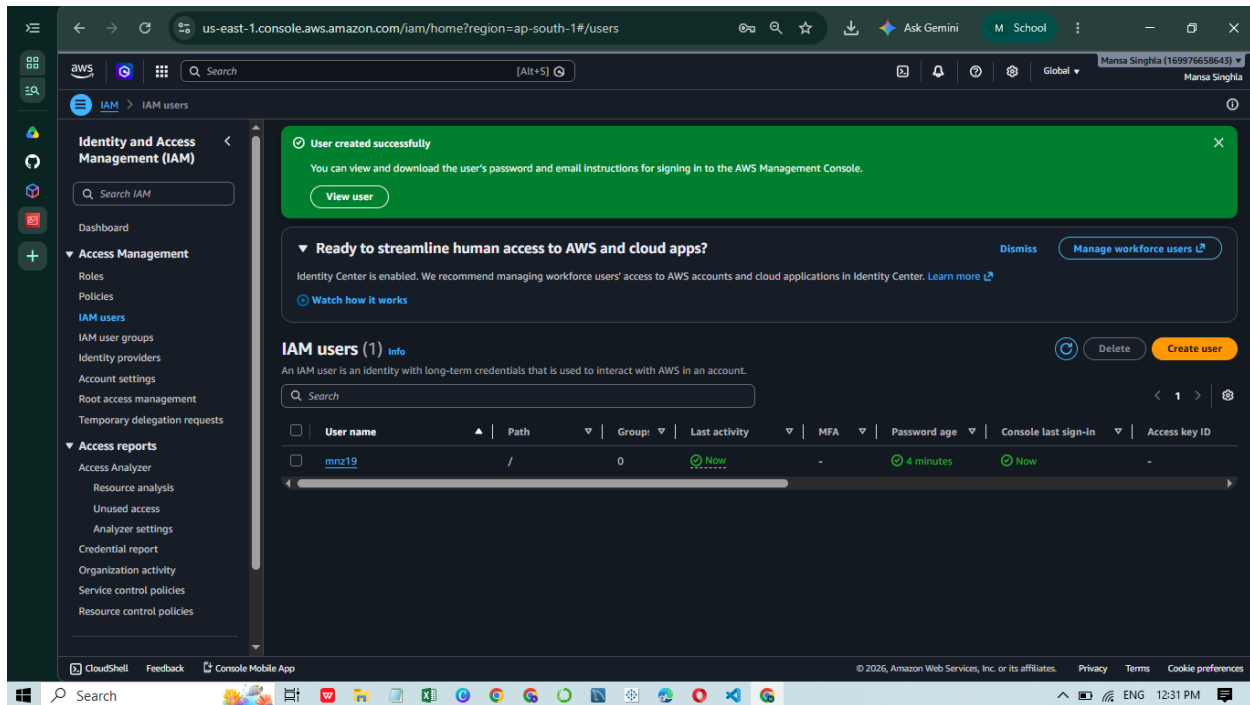

- Account ID or alias (Don't have?): 169976658643
- Remember this account: ☐
- IAM username: mnz19
- Password: [masked]
- Show Password: ☐ Having trouble?
- Sign in button
- Sign in using root user email button

To the right of the sign-in form is an 'Amazon Lightsail' advertisement with the text 'Lightsail is the easiest way to get started on AWS' and a 'Learn more »' button.

The bottom part of the image shows the 'Console Home' page. It features a 'Recently visited' section with a message 'No recently visited services' and links to EC2, S3, CloudWatch, and IAM. On the right, the 'Applications (0)' section shows the region 'Europe (Stockholm)' and a 'Find applications' search bar. Below this, a red error box is visible with the message 'Access denied to servicecatalog:ListApplications' and a 'Diagnose with Amazon Q' button.

A blue tooltip titled 'Account color' is also present, stating: 'You can now set colors for accounts to identify them at a glance. Choose "Account" from the account menu in the AWS Management Console to get started. Learn more'.

# Identity Access and Management (IAM)

## Step 7: Verify User Creation

- Return to the IAM Users page.
- Confirm that the newly created user appears in the user list.
- Verify the assigned permissions and account access details.

## Outcome

A new IAM user is successfully created and configured with the required permissions, allowing secure access to AWS resources according to the organization's access control policies.
